DIV. OF OIL, GAS & MINING

SMALL MINING OPERATIONS PROGRESS REPORT
January 1, 2014 to December 31, 2014

The information required in this form are based on provisions of the Mined Land Reclamation Act, Title 40-8, and the R647 rules as under the Utah Minerals Regulatory Program. The report is due January 31 each year.

1. Mine Permit Number: S/O 150102 /0
2. Mine Name: Green River #9
3. Name of Operator/Permittee: Kimmerle Mining LLC
Note: If Operator's address, company representative or phone number have changed, please provide a replacement page for the Notice of Intention together with form MR-REV available on the Division's web page at https://fs.ogm.utah.gov/pub/MINES/Minerals_Related/FORMS/MR-REV-SMO_EXP.pdf.
4. Report the gross amount of ore or product mined and waste moved
Gross ore or product mined 700 (amount) tons (units)
Waste material moved 300 (amount) tons (units)
Primary Commodities Produced uranium
5. New disturbance created during the year 0 Acres
Area reclaimed during the year 0 Acres
TOTAL disturbed area at the end of the year 1 Acres*
*The total disturbed area should not be greater than the permitted and bonded acreage.
6. Briefly describe any reclamation work performed during the past year. Attaching a map showing disturbed and reclaimed areas is recommended (per R647-3-105).
stabilized slopes, reinstalled culverts, reconstructed water bars

Note: To apply for full or partial bond/site release submit form MR-SITE available at the Divisions web page at https://fs.ogm.utah.gov/pub/MINES/Minerals_Related/FORMS/MR-SITE.pdf.

I hereby certify the information provided in this report is true and correct to the best of my knowledge and belief.

Subject: Status Update, Kimmerle Mining, Green River #9 Project, S/015/0102, Emery County, Utah

Dear Mr. Kimmerle:

According to records of the Division of Oil, Gas and Mining, the Green River #9 Project was permitted as an exploration site in 2009 and in 2014 converted into a small mine. The annual reports for the exploration project and the small mine show no activity on the site.

Rule R647-3-113.3 states, "In the case of a termination or suspension of mining operations that has exceeded, or expected to exceed two (2) years, the operator shall, upon request, furnish the Division with such data as it may require to evaluate the status of the small mining operation, the status of compliance with these rules, and the probable future status of the land affected."

By February 29, 2016, please submit a report showing past exploration and mining activities and anticipated future mining, including a timeline of anticipated future mining operations.

If you have any question please call me at 801 538-5261 or Wayne Western 801 538-5263.

Sincerely,

Paul Baker
Minerals Program Manager

Mineral
&
Annual
Report

Jan 27, 2016

Narrative of past activities at the Green River #9 mine 2009-2015:

Past operations:

Underground exploration has taken place each year. This work has consisted of bulk sample removal, underground drilling, surveying, and mapping underground workings.

Total production from the mine has been about 2700 tons of ore.

Surface disturbance has been limited to a total of approx 1 acre at the mine mouth. This consisted of cleaning out the decline mine entrance, installing 2 large culverts, waste rock removal, ore removal and shipping. The entire surface disturbance is within the bonded area.

Current Operations:

With the depressed uranium prices the only current activities at the site are occasional underground exploration activities.

Future Operations planned:

The mine is being maintained in order to be put into immediate production once market conditions warrant production. Underground exploration will continue in order on a limited basis in order to identify additional ore reserves.
